

## Creating an illusion of life

'Dental laboratories are a melting pot, where we use wax, metal, porcelain, care, commitment and above all, passion, to create an illusion of life.'

For several months, these words from a friend of mine have inspired me to organise the Dental Forum 2008 as a unique event, from the exhibition to the conferences. News of the event has spread through our network of manufacturers, distributors and

their representatives, who have confirmed that they will be exhibiting their latest technology and equipment, in many cases showcased in France for the first time. Everything is set to make the exhibition a real show-room of dental art.

## Dental Forum, Paris, France: A unique event for Dental Laboratories 13th - 15th March 2008

**T**he Dental Forum is a unique event featuring extensive conferences and a major exhibition specifically for Dental Laboratories. It is organised every two years by the UNPPD (National Union of Dental Laboratory Owners in France). They wanted to make Dental Forum 2008 a thrilling, not-to-be-missed event featuring magical conferences.

### ● Organisation

First we designed an ideal conference hall to welcome the speakers. Then we defined our image, sound and light requirements.

#### Conference Halls

2 exceptional rooms have been created to welcome our orators for three days, one of which has a 500-person capacity.

#### Image

12 x 4 metre panoramic screen, with 3 BARCO video projectors of 10 000 lumens.

#### Sound

Multi broadcast system, with 24 speakers distributed around the conference hall and 6 NEXO amplifiers for regular sound throughout the hall.

#### Lighting

Over 50 spotlights to create atmosphere on stage.

What a promising setting! But all this is nothing without inspiring speakers...

### ● Speakers:

- Mr Claude Sieber (Switzerland), a master in photography and the art of beauty, he is an 'artist' who makes us dream...
- Mr Jürgen Braunwarth and Mr Jochem Peters (Germany), known for their exceptional "Live Restorations"
- Mr Jürgen Mehrhof (Switzerland), creativity at its best...
- Mr Franck Kaiser (Brazil), will tell you all about 'Milling from another angle,'
- Mr Luc Rutten (Belgium), he's not just a nice guy... he is also a master in creating porcelain 'illusions'
- Mr Richard Scotolati (Switzerland), 'The polyvalence of intra-oral recording, according to Gerber'
- Mr Jean-Marc Etienne (France), Nothing beats seeing him live, you have to admire him...

### ● More speakers!

- Mr Enrico Steger, the engineer who invented MAD/MAM, presents '5 years experience with zirconium'
- Mr Serge Grynfas, in addition to his jokes will also present 'CAD/CAM, by man's hand intelligent'
- Mr Jean Michel Moal, 'Evolution and perspectives with Procera'
- Mr Michel Rathier, always ready to share his ideas, presents, 'What daily occlusion should be'
- Mr Jean Pierre Levot, 'Nobel Rondo layering or pressed ceramics, an informed decision'

- Mr Bernard Guggisberg, 'Attachments and alloy in prosthetics'
- Mr Georges Bourrely, 'Modelling big restorations'
- Mr Richard Abulius, 'Creating porcelain gingiva in implant restorations'
- Mr Dominic Behaeghel, 'Day-to-day CAD/CAM for everyone'
- Mr Nunes & myself to welcome you with, 'The future, what we are becoming...'

### ● Where? When?

At the 'Palais des Congrès de L'Est Parisien' just outside Paris on the metro in Montreuil. The event will take place from the 13th to the 15th March 2008.

This event has been created just for you, each of our speakers will share their vision, their passion, their skills and their art with you... These meetings are too few and far between.

### ● Tell me more!

The cost for attending 3 days (conferences and exhibition) is 180 €

Discounted rate: 50 € for students

Registration deadline: 01/02/2008

Available places: 500

For more information or to register now visit:
